

# Supreme Optical Precision for More Productive Process Control

Process Control for Paper,  
Pulp and Printing Industries

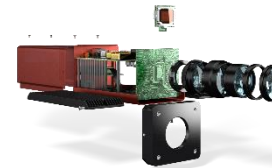

## **System Architecture**

- Same smart camera for all applications
- Same computer model for entire production line
- One comprehensive, integrated user interface for web inspection and web monitoring with a single server configuration

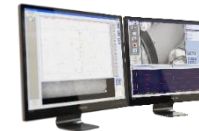

## **Cameras**

- True smart cameras with compact packaging
- Fastest and most accurate cameras
- Future proof image sensor design
  - Easy to upgrade when needed

## **Integrated Platform**

- Integrated user interface for WIS, WMS and paper quality
- Seamless WMS & WIS integration enables accurate, effective & fast defect root cause analysis
- Identical components for WMS & WIS

## **High Tech Lights for Web Monitoring**

- Powerful strobe LED light controlled by cameras
- Stainless steel housing for hostile environment
- Cooling & cleaning options for all machine locations

## **Carbon Fiber WIS Frame**

- Eliminates machine induced vibration
- Smallest size & lightest weight in the market
- Innovative teflon foil for LED – no glass
- Compact smart cameras inside the beam
