

New TURBOVahtoJetter for Gulf Paper in Saudi Arabia

GULF PLY CO. FOR PAPER MANUFACTURING LIMITED (GPP) is a Saudi Arabian company which is part of the Mohammed Al Ojaimi Group. The group was founded in 1976 by its proprietor and General Manager Mohammed Al-Ojaimi to service the electric power transmission and distribution industry for private sector and civil turnkey projects. It has more than 7,000 employees.

MOHAMMED AL-OJAIMI GROUP plans to install a Gypsum Board paper and Packaging Paper Grade Paper Plant as part of its continuous business expansion strategy. A suitable 73,500 sq.m site has been acquired in the country's third biggest industrial city, Dammam, which is around 75 km from both Dammam airport and sea port.

To improve the existing paper machine Bellmer will deliver a hydraulic TURBOVahtoJetter headbox with TURBODiluter and TURBODamper air cushion attenuator for the bottom layer. Six new drying cylinders will extend the dryer section and improve drying capacity.

The training of GPP's staff will be an important part of the start-up process.

The TURBOVahtoJetter is the new heart of the machine in Saudi Arabia
